

Amito 1/4 racks Interxion London

LON1, LON2 & LON3

LON1: 11 Hanbury Street, London, E1 6QR

LON2: Dray Walk, London, E1 6QL

LON3: Block C Truman Brewery, Brick Lane, London E1 6QL

Established colocation ecosystems in the heart of London's Shoreditch Tech Hub

Interxion's LON1 facility opened at the height of the "dot-com" boom and being so close to London's historic financial district, The City, attracted a range of financial services interested in the low average latency from this location to key trading venues to the east and west of the City.

LON2 opened in 2013 adding a further 20,000 sq ft of additional capacity and the similarly sized LON3 opened in 2019. It is possible to run standard cross-connects between all three of the closely located data centres.

Interxion's customer base has since widened to reflect the fast-growing tech community based in the now "trendy" heart of London's Shoreditch, with an established LINX node on site and impressive carrier list. Interxion offers a strategically located alternative to other Central London data centres located in Docklands.

Amito in Interxion

Amito's quarter racks are available in all the Interxion buildings and the "campus cross-connect" model now offers access at the cost of a normal "in-building" cross-connect to all three of Interxion's London data centres.

Amito Quarter Racks in Interxion

Details of our quarter racks are as follows:

- **Space:** 10U in a cabinet 600mm wide (standard width) and 1200mm deep
- **Power Delivery:** Dual A+B power supplies. Each power bar has 8 x C13 power sockets

Amito Quarter Rack rear view showing dual power bars

Amito Quarter Rack front view

- **Inclusive Power:** We include 1kW, about 5Amps as standard but more is possible by arrangement
- **Secure:** The unit is fully lockable. We set up with your own combination code on the lock. Cross-connects are delivered via secure cable trunking to your unit so no risk of interference from other occupiers as are the dual power feeds
- **Access:** Is available 24x7 on an unaccompanied basis for all your personnel who are on your access list (managed by yourselves via the Amito Portal)
- **Onsite Support:** 24x7 remote hands services is available on a pay as you use basis
- **Cross-connect Charges:** Are based on Interxion's price lists for both installation and recurring fees

Cross-connects

We order all cross-connects as needed by our clients and clients ordering less than six can order one at a time whilst clients taking more than six can pay for and install their own dedicated patch panel.

Amito can offer slightly lower charges for high volume clients using six or more cross-connects.

All cross-connects are listed on the Amito Customer Portal and includes details such as start date, A-end, B-end. Clients can add their own description to each cross-connect once its logged on the system for easier future reference.

Network

The Amito part rack service is available as a colocation service only and clients can make their own network arrangements as they require. However, Amito offers a range of highly competitive network services including Internet ports and data centre interconnects to the other 14 London data centres that we operate in (including Amito's Reading data centre) at 1, 10, 40 and 100Gbs.

AMITO DATA CENTRE

Amito part racks are available in:

- Telehouse (North, East, West, North2)
- Interxion (LON1, LON2, LON3)
- Global Switch (North, East)
- DRT (Sovereign House, Sovereign North, Bonnington House, Cloud House)
- Equinix, Slough (LD4, LD5, LD6, LD7, LD10)
- Equinix LD8

Customer Portal

Amito's unique customer portal puts you firmly in the driving seat. A comprehensive ERP (enterprise resource planning) system, it provides instant visibility and control over your entire range of services with Amito via a 'single pane of glass', even across multiple locations.

You can:

- Arrange access and check access logs
- View bandwidth, power usage and network usage via straightforward graphs
- See details of all your rack locations and cross-connects
- Review performance data
- Book remote hands
